2019 Exam Logbook Information – Update

Some of the 2019 ABMGG Logbook Excel® spreadsheets have had functionality issues. Updated sheets have been posted on the 2019 logbook site – trainees should be using the most current version available. Instructions on how to transfer data from previous to current versions are provided on that site and posted below for convenience.

A summary of the logbook changes can be found here. More information will be sent to program and training directors on their attestation responsibilities.

Questions can be directed to Jennifer Jarmin, Chief Administrative Officer, at ABMGG@abmgg.org or (301) 634-7315.

2019 Logbook Excel Tools – Instructions for Transferring Data

Note: Only migrate data from fields you have entered yourself. Attempting to transfer pre-set or calculated fields may prevent the tool from functioning as desired.

- Select the first row of user entered data (for example: D3 through AK3*)
- Press ctrl+shift+down-arrow-key to select all the data you have entered
- Copy and paste this data into cell D3 of the new workbook
- Repeat this exact process with the data in columns AT-AU.
- After using ctrl+shift+down, ensure that all of your entered data has been selected. If not repeat the keypress until all data has been selected.
- Reenter your supervisor information on the Supervisor List worksheet.

*the specific cells may vary according to logbook. Please take care to select the correct fields.

This process should be very quick, however if you are using an older computer or have many cases to transfer it could take several minutes to complete
